

Expertise, Experience, Process Knowledge Methodology and Commitment

TO MOVE YOUR PROGRAM FORWARD..... SUCCESSFULLY !

Program Management

Vyomus Consulting is a Regulatory Science and Product Development Consulting firm, serving Business to Business (B2B) Customers in highly regulated industries. Our services help Biopharmaceuticals, Medical Devices, Diagnostics, Cosmetics & Wellness, Food & Nutrition organisations Commercialise products, Reduce time to market, Achieve compliance and Grow their business efficiently and effectively.

Managing and co-ordinating Product Development Programs and Projects can be an overwhelming and time-consuming task. At Vyomus, our multi disciplinary team of expert drug developers and project managers facilitate a seamless transition between program planning, project management, implementation and program execution to attain program goals within agreed upon service levels. Further, we have developed a flexible financial model that can facilitate your cash flows and significantly reduce your development budgets.

We start the engagement process by assigning a dedicated senior resource as a Program / Project Manager who would be the single point of contact throughout the process. Further, the project manager coordinates the decision-making process by identifying key issues and decisions that need to be made in a timely manner so as not to unnecessarily delay projects.

Our wealth of knowledge and experience will help ensure that your product is developed within an optimal timescale and budget since, at each stage of the project implementation lifecycle, Vyomus focuses on impacts and results for both business and functional stakeholders.
