

Analytics Practice

Clinical Data Analytics Case Study

Case Study

Client

An Indian MNC with group revenues exceeding USD 30 Billion, wanted to associate with a partner who could provide world class clinical data analytics services catering to their global customers.

Challenge

The business head was challenged by management to provide a regulatory compliant, customer acceptable, cost efficient, process effective, service. A part of the service had to be provided from their delivery center and the remaining service had to be provided from the partner's delivery center. Scope : all global studies (pilot & pivotal).

Solution

- Vyomus Consulting created a customer specific – Clinical Data Analytics delivery team consisting of clinician/s, pharmacokineticist/s, pharmacodynamist/s, SAS programmer/s and Biostatistician/s (with experience in analysing and reporting studies for Indian, European and the US markets/regulators) under a Project Manager who acted as the point of focus for this engagement.
- Based on the requirement the team would work from the customer's delivery center and or Vyomus Consulting's delivery center.
- Vyomus Consulting assisted the customer in creating a merged, enhanced delivery process (turnaround time, response time, consultation, cost etc.,) with minimal disruption.
- Vyomus Consulting also delivered a detailed framework for Project delivery, specifications, rules of engagement, escalation matrix etc., in-line with customer expectations and requirement.

Results

Vyomus Consulting developed and implemented a Clinical Data Analytics Group as required by the customer to meet and increase their value chain efficiency thereby meeting their business goals / objectives. This group provided an integrated, flexible, just-in-time delivery solution which could provide a regulatory compliant, customer acceptable, cost efficient, process effective, service to meet medicine development demands of global customers based out of Europe, US, Japan and India.
